ACCESSORIES PRODUCT LINE

SUBMARINE ACCESSORIES DEPARTMENT

In order to be always complementary to the Offshore Companies, P.C.S. Italiana S.r.l. design and manufacture an extensive range of accessories for submarine cables.

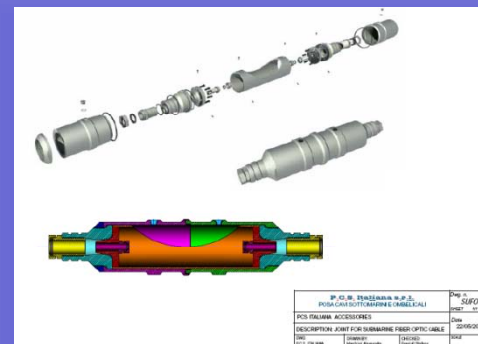

Our Accessories department can grant a suited solution for power, optical, control and composite cables connection necessities.

Our range up to 69 kV could fit each Customer requirement and comprise:

- Terminations
- Junction boxes (Straight or vertical on top of riser, both accessible for inspection or fully sealed and unaccessible)
- Submarine Joints (with shells or universal type)
- Hang-off for cables armour (three different solutions)
- Pulling heads and Bullnoses

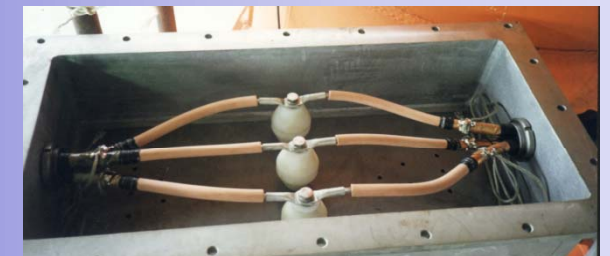

Hang-off solutions

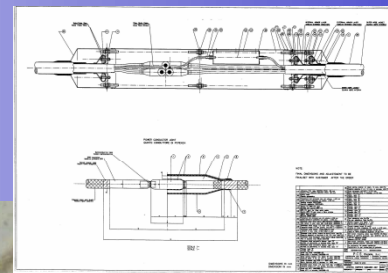

Submarine fibre optic joint

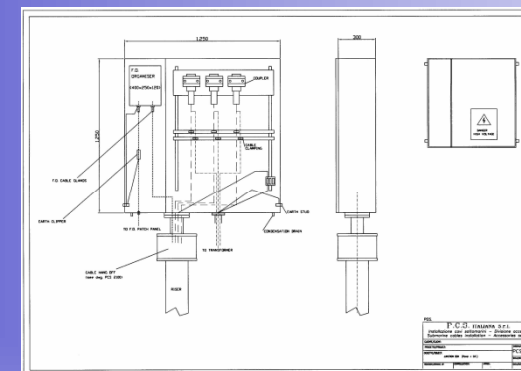

Switchgear Terminations

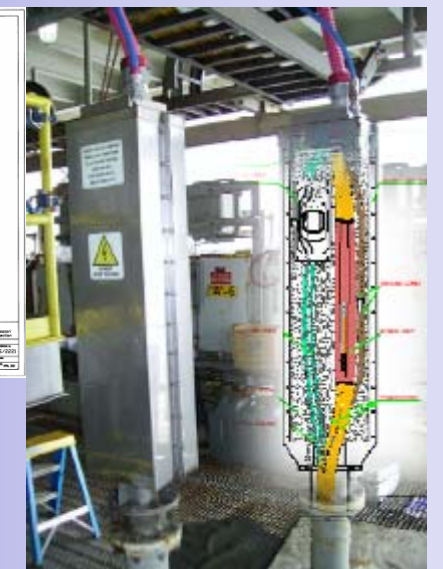

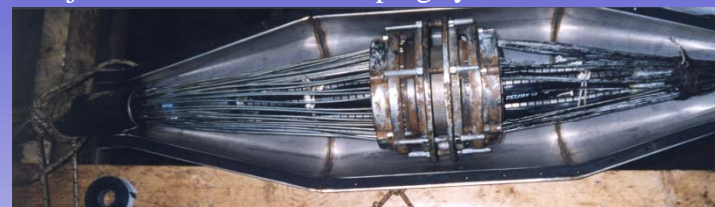

Straight Junction Box

Submarine joints with armour clamping system

Vertical Accessible and Unaccessible Junction box

Thanks to our in-house organisation and skilled technicians, we are also able to propose an innovative service of “Emergency Team” for the immediate damage localising on submarine cables, providing world-wide the necessary joints and technicians for the execution of the repair within few working days from the damage.

This service could be entered in a form of agreement with the interested Companies, fixing the repair cost rates in case of event since the beginning. The agreement has a “no cost” policy for the Companies and the defined rates will be applied only in case of an “Emergency” intervention.
